

ACP Pad

nitrile rubber

Operating Temperature Range:
-10~100 degrees

silicone

Operating Temperature Range:
-60~250 degrees

Product Introduction

The mechanical gripper is equipped with a wear-resistant rubber fixture at the front end of the claws. This fixture enhances the friction between the gripper and the workpiece, providing surface protection to prevent any harm or damage during gripping. It ensures that the workpiece remains intact without surface destruction, ultimately achieving optimal gripping performance.

Product Advantages

- Increased coefficient of friction
- Available in various sizes for selection
- Modular design
- High load-bearing capacity
- Temperature resistance: -60 to 250 degrees
- Various gripping solutions

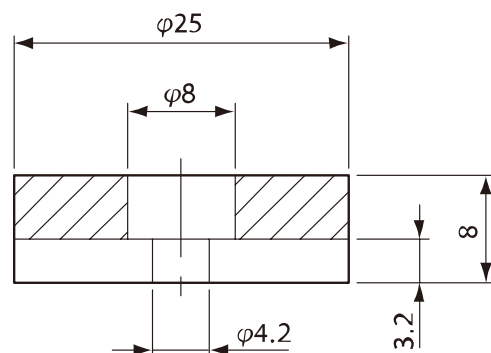

Material	Heat Temp. (°C)	Hardness	Color
NBR	-10~+100	Shore A70±10	Black
Silicone	-60~+250	Shore A70±10	White

■ ACP-015

round · black $\phi 25$

Material: nitrile rubber

Weight: 13g

■ ACP-074

round · white $\phi 25$

Material: silicone

Weight: 13g

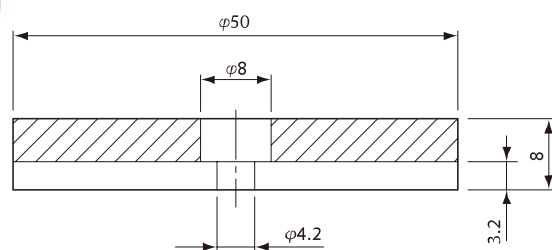

■ ACP-016

round · black $\phi 50$

Material: nitrile rubber

Weight: 53g

■ ACP-071

round · white $\phi 50$

Material: silicone

Weight: 53g

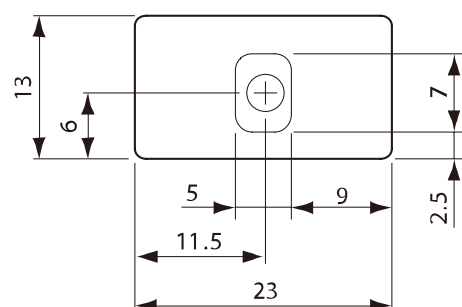

■ ACPUM-01

rectangle · black ·

Material: nitrile rubber

Weight: 5g

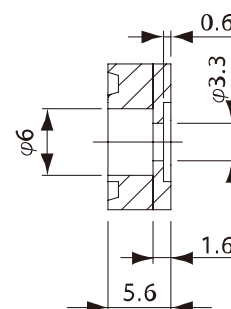

■ ACPUM-01(SR)

rectangle · white

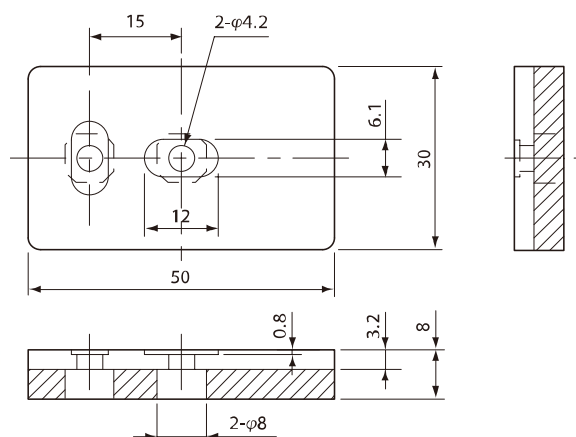

Material: silicone

Weight: 5g

■ ACPL-060

rectangle · black · 2 holes
Material: chloroprene rubber
Weight: 43g

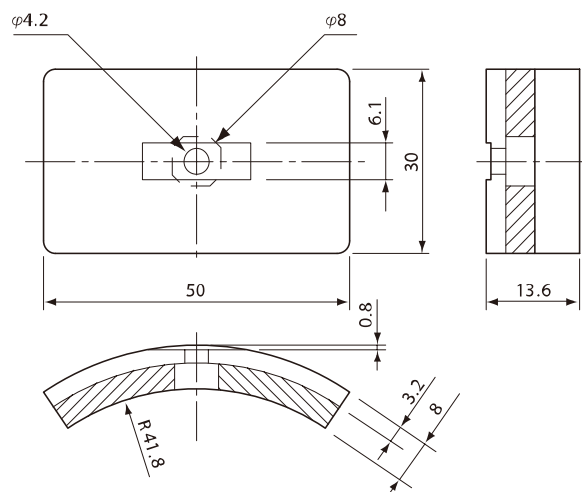

■ ACPL-061

rectangle · white · 2 holes
Material: silicone
Weight: 43g

■ ACPL-018

curved · black
Material: chloroprene rubber
Weight: 19g

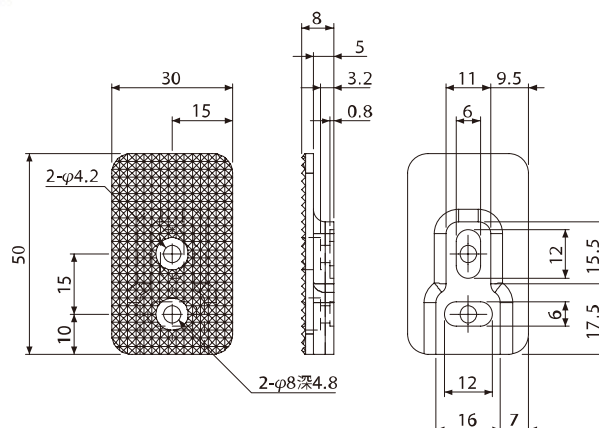

■ ACPL-072

curved · white
Material: silicone
Weight: 19g

■ ACP-06F

Steel pad
Material: Steel
Weight: 37g

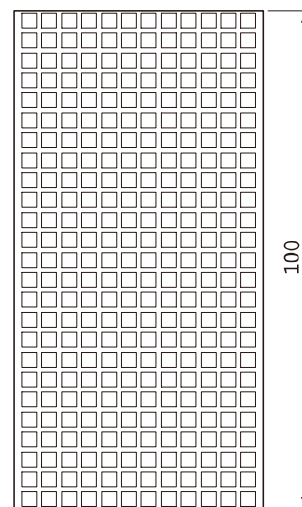

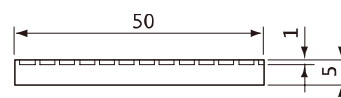

■ ACP-100

Rubber Pad · Black

Material: nitrile rubber

Weight:27.6g

TYPE : 5Tx50x100

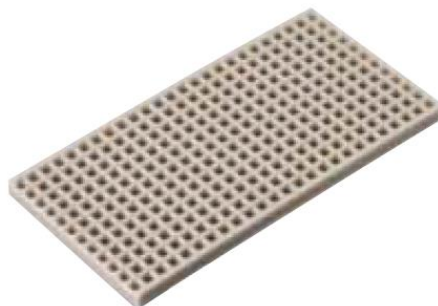

■ ACP-100-1

Rubber Pad · White

Material: nitrile rubber

Weight:27.6g

TYPE : 5Tx50x100

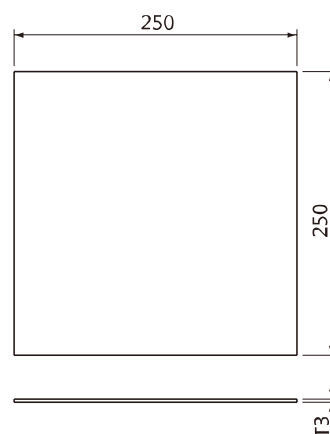

■ ACP-250

Silicone Sponge

Material: Silicone

Weight:102g

TYPE : 3Tx250x250

■ A8008

Adhesive · cemedine

NET:135ml
