

## MPT Mini foam gripper

Vacuum type: Internal generator

Suction surface type: Foam

3C product

Packaging

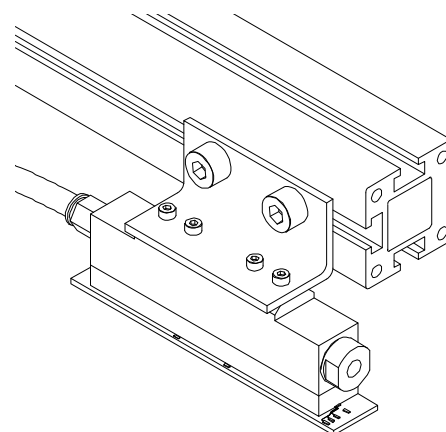

### Introduction

- Internal vacuum generator, main body of aluminum oxide, well-wearing foam
- Small size, easy installation, good suction stability, easy maintenance
- The customer can choose the appropriate model according to the actual application. The internal generator can save space structure, and then quickly generates vacuum ,easily controlled.
- The foam type can achieve gentle contact, and can achieve traceless handling, traceless gripping and blind suction without positioning when contacting glass and other sensitive workpieces.

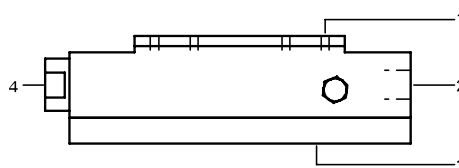

### Application

- Used to suction light small sensitive workpieces such as 3C products, glass screens, electronic components and PCBs, etc.
- The foam type can also be used for packaging, e.g. sorting, label sticking, etc.

### Structure

- (1) Mounting hole
- (2) Compressed air inlet
- (3)Foam suction surface
- (4)Exhaust port

61× 18  
111× 18

## Technical parameters

Model	Maximum vacuum degree %	Air consumption l/min	Suction force N	Weight kg
MPT-SW-61× 18	85	36	6.2	0.1
MPT-SW-111× 18	85	36	15.7	0.2

## Design parameters

MPT-SW□

P: Compressed air inlet (G1/8)  
V: Vacuum detection port (G1/8)  
R: Exhaust port  
D: Mounting hole (M3)

Model	Size (mm)		
	L	X1	X2
MPT-SW-61×18	61	8	8
MPT-SW-111×18	111	28	12
